M. Pria Admaja

I'm a frontend developer with a background in agriculture. I began learning to code in mid-2022 and joined the Fazztrack Bootcamp in early 2023. Since then, I've focused on building web applications using JavaScript, TypeScript, React.js, and Next.js. I also have experience with React Native, Node.js, Express.js, and PostgreSQL. I'm always looking to improve and stay updated with the latest tools and practices in tech.
